Subject: Kansas CCR Permit Program Application

To: Region 7 and Headquarters Staff:

In accordance with EPA's changes to the CCR regulations published in the Federal Register on July 30, 2018 (Hazardous and Solid Waste Management System: Disposal of Coal Combustion Residuals From Electric Utilities; Amendments to the National Minimum Criteria (Phase One, Part One)), Kansas intends to make minor changes to the Kansas CCR standards that were submitted with our application submitted to EPA on July 18, 2018. We believe the changes made by EPA in these regulations are an improvement which we wish to incorporate into our state standards. We expect to submit updated Kansas CCR standards as an addendum to our application within the next couple of weeks.

As we indicated when we submitted the initial application, please feel free to contact me with any questions that you may have.

Bill Bider
